TOOLS

Use specific tools to help with conversion on your website:

[Unbounce](#) – Landing page builder. Take the next step from manually building pages and create multiple pages to test messaging, provide variable discounts, or measure ad effectiveness.

[Buzzsumo](#) – Research and development tool for Content Marketing to help stay current in a changing landscape.

EMAIL MARKETING

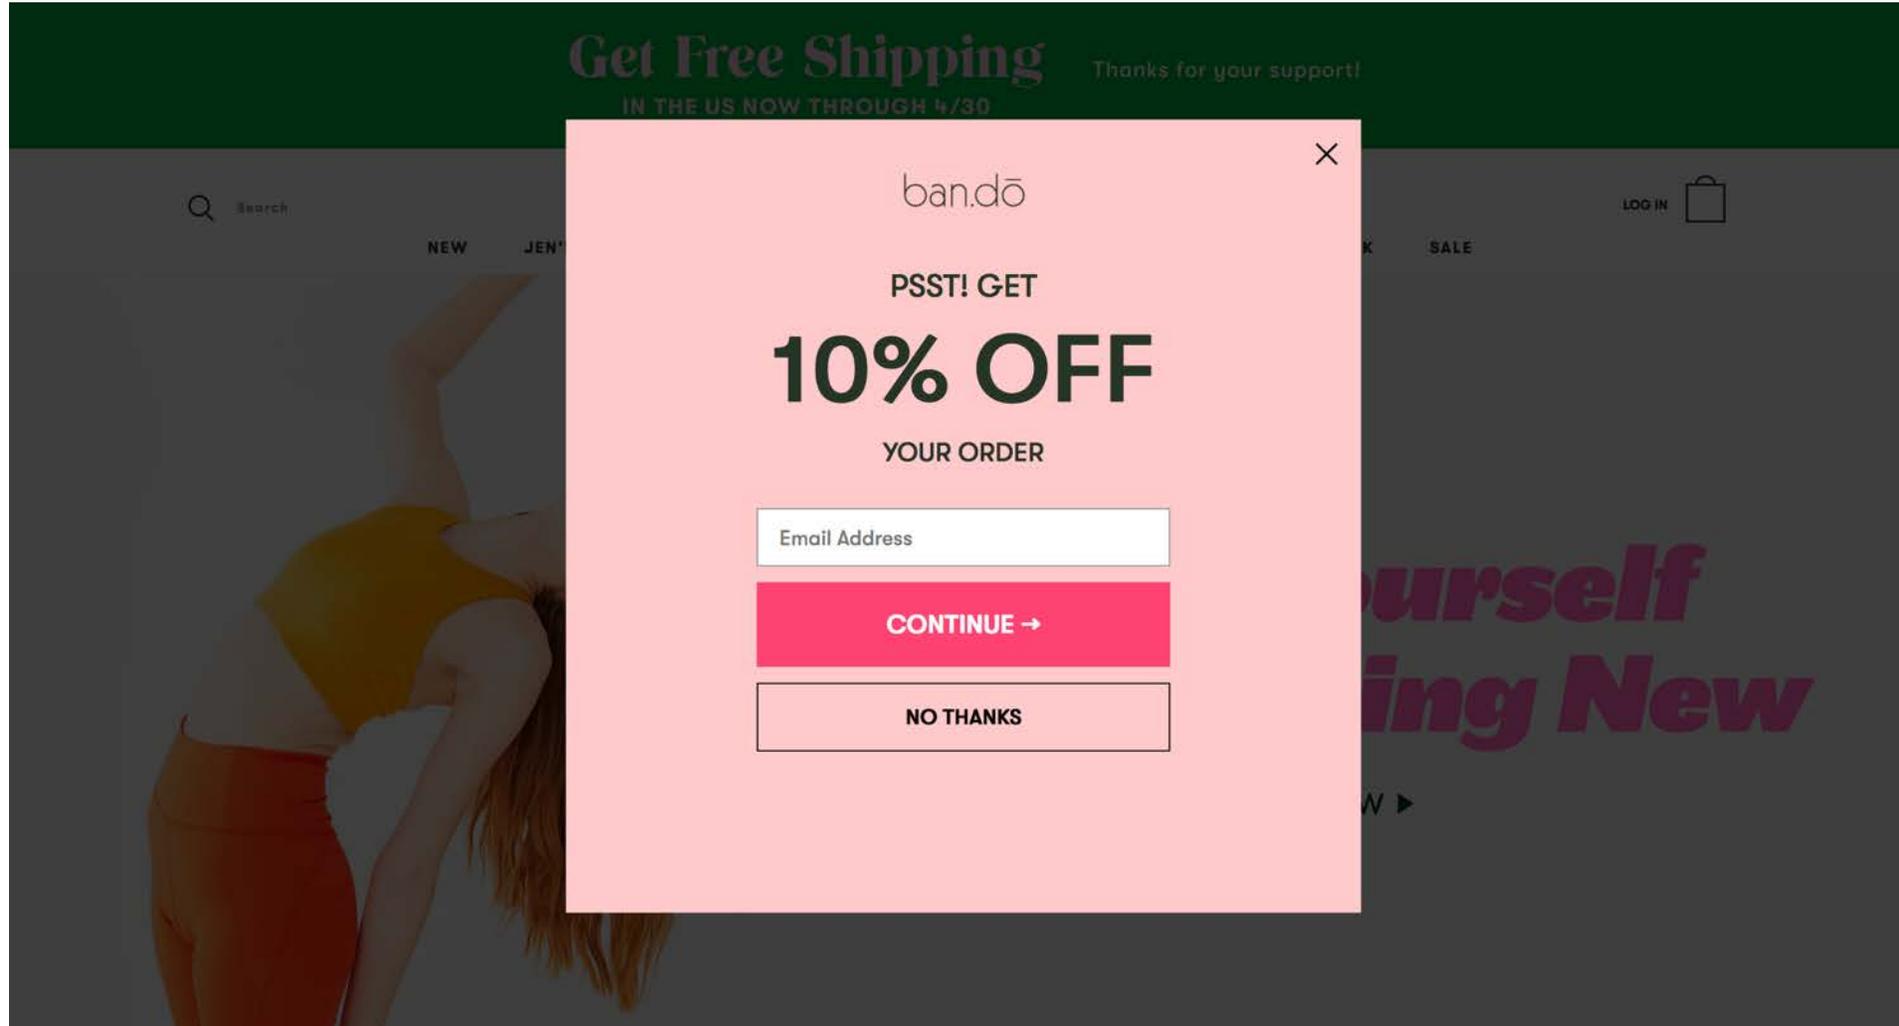

EMAIL MARKETING IS STILL INCREDIBLY IMPORTANT TO BUSINESSES

Email lists generated from customers are very high value, purchases lists low value.

Curate email lists from website subscriptions, sales, personal contacts, giveaways.

Content needs to be contextual – segment your lists for higher opens/response.

Email Marketing

DRIP CAMPAIGNS

Drip campaigns are a set of pre-written emails that are automatically sent over time.

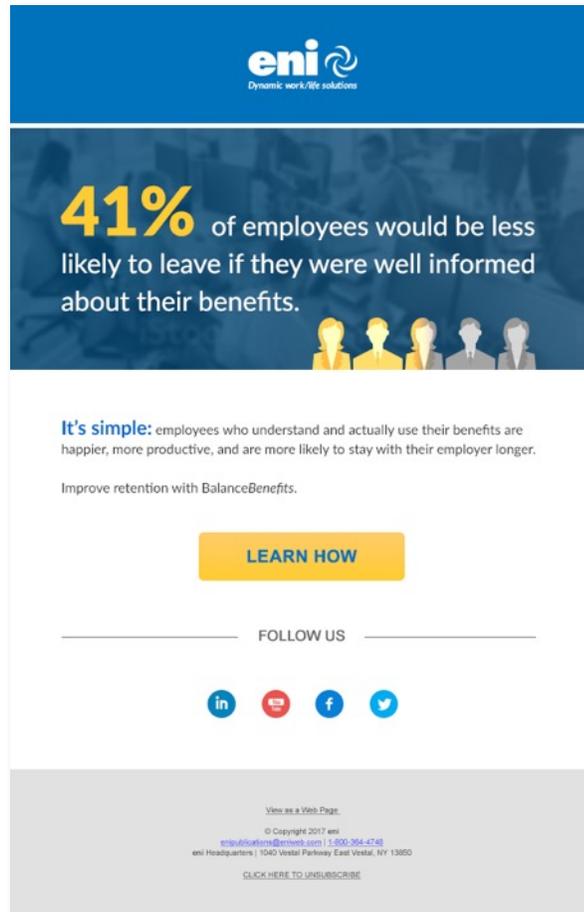

I.e. customer signs up, email one sends immediately. Email two sends in 3 days. Email three sends in week. Can also be based on triggers (didn't open #1? another email can go out).

Use this time to plan your campaigns.:
Welcome, Post Purchase, Abandoned Cart, Re-engagement, Seasonal, etc.

TOOLS & TIPS

MAIL SEND PROGRAMS

[Mailchimp](#) & [Klaviyo](#) are two easy to use platforms, depending on how much UI you need and how in-depth you want drip campaigns to be.

CLEAN LISTS

Whether developed in-house or purchased, make sure to clean email lists with a service like [NeverBounce](#) to ensure deliverability.

SEND FROM CRM

If you use a Customer Relationship Management tool like Hubspot or Salesforce, send you emails directly from those to enhance tracking and analytics.

NEWSLETTER

While it can seem outdated, newsletters are a great way to stay top of mind and provide value to your customers.

RELAUNCH CAMPAIGN

When businesses begin to open again, customers will want and need to know information about your new schedule, policies, products and services.

Plan a drip campaign to relaunch your business to drive initial sales.

SOCIAL MEDIA

Social media is where people spend their time – it's where your customers are.

Most of your traffic and customers will come from social media.

ORGANIC

- People liking, sharing, commenting and otherwise “engaging” with content that you post, or posting their own content about your company.
- Earned by providing value. Information, social, psychological value need to be mixed on page.
- Use for additional business updates

VERSUS

PAID

- Using in-site advertising platforms to target a social network’s users.
- Different rates per platform, but highly targeted, low cost advertising depending on industry.
- Advertise your reopen to drive traffic.

ORGANIC TOOLS

[Hootsuite](#) – manage all social media accounts in one place. Schedule in advance.

[Planoly](#) – lay out IG feed and schedule posts.

[Canva](#) – design social media posts easily.

[VSCO](#) – professional photo editing app.

SOCIAL MEDIA ADVERTISING

UNDERPRICED OPPORTUNITIES

Every social media platform has full ad capabilities baked in. A quick Google search of “how to advertise on ____” can answer the basic how-tos of getting set up and getting ads running. The key is capitalizing on the underpriced attention that still exists today and creating contextual ads for each platform.

FACEBOOK / INSTAGRAM

USE AD MANAGER

Boosting posts from feed is only a small fraction of what can be done with Facebook/IG ads. Use the full manager for granular control of targeting, ad sizes, and testing.

INSTAGRAM

IG is the one place where boosted posts work well – especially on giveaways or contests. Run a giveaway to maximize both organic and paid reach.

LINKEDIN ADS

NOT UNDERPRICED

LinkedIn has an artificial floor so use them very wisely. Have a plan in place for conversion – landing pages, a high value offer, and method of following up.

JOB ROLES TARGETING

Take full advantage of LinkedIn targeting by selecting other businesses that are in open sectors.

COMPANY TARGETING

Ads are expensive because you can carefully select employees at one specific company.

CONTEXTUAL

More than any others, content needs to be relevant to the user and provide immediate value

SEO

SEARCH ENGINE OPTIMIZATION

SEO is a long term strategy, no quick fixes.

Buying links and other old tricks will likely backfire with new algorithms.

Local SEO is likely the most easily manipulated in the short run and focuses on people near your business who will be searching for you.

LOCAL SEO

GOOGLE MY BUSINESS

Claim your Google My Business profile and include as much information as possible. Update Photos occasionally, keep hours up to date.

CLAIM & OPTIMIZE

Claim and optimize any other profiles/directory listings for your company online. YELP, TripAdvisor, Chambers of Commerce

DEEPER OPTIMIZATION

Use [Moz Local](#) to optimize even more directories and keep all your data up to date with one dashboard.

KNOW WHERE YOU STAND

Use free tools like [LXRSEO](#) or paid tools like [SEMrush](#) to analyze your rankings, competitors and more.
